Frontend: HTML, CSS, Bootstrap, JavaScript, React.js\*

**Backend**: Java, Express\*, Node.js\*

**Databases** : SQLite

\*courses yet to be completed

#### **PROJECTS**

## **Conference Website** (Balaconference.ccbp.tech)

Developed a Conference website where users can see information about conference like attendees count, workshops, speakers and countries attended, after movie of conference

- Implemented mobile friendly layout using different HTML block, inline elements, and styled using CSS3 properties such as background, flex and CSS box model properties.
- Implemented Conference video using bootstrap embed component.

Technologies used: HTML, CSS, Bootstrap

### **Countries Search (Balacountry.ccbp.tech)**

Developed responsive countries search application which shows all countries and respective populations in the world. We can also search by specific country

- Fetched countries list from a server asynchronously using fetch GET HTTP API call and implemented responsiveness using Bootstrap grid system and CSS box model.
- Implemented local search functionality by using input element, JavaScript event listeners & filtered countries using the Array filter method.

**Technologies used:** HTML, CSS, JS, REST API Calls, Bootstrap

# Wikipedia Search Application (Balawikipage.ccbp.tech)

Developed custom Wikipedia search application where users can search and view curated results and can see detailed explanations in Wikipedia by clicking on the specific result

• The displayed list of search results with HTML list elements with hyperlink as URL, styled list using CSS, Bootstrap, and implemented responsiveness using Flex properties and CSS Box model.

• Fetched search results from a server asynchronously using fetch GET HTTP API call. When a user clicks on a particular result, opens the website in a new tab by using the target attribute of the anchor tag in HTML.

Technologies used: HTML, CSS, JS, REST API Calls, Bootstrap
